REAL CAPABILITY

**ISO 45001:2018 Overview for
Managers (OH&SMS)**

HS019

ISO 45001:2018 Overview for Managers (OH&SMS)

ISO 45001 has replaced OHSAS 18001 and will afford organisations an opportunity to align their strategic direction with their health and safety management system thereby improving their occupational health and safety performance.

Irrespective of whether a company is a manufacturing or service industry, it has a statutory obligation to operate in a manner that safeguards the health and safety of its workforce. Implementation of a recognised occupational health and safety (OH&S) management system such as ISO 45001 is one way to meet that obligation.

The aim of this course is to provide delegates with an understanding of the management systems approach and the requirements of ISO 45001. This course will provide managers with an understanding of the importance of ISO 45001 as a tool for improving the health and safety performance of companies with reference to its employees, contractors and visitors.

The structure of ISO 45001 is based on Annex SL format and terminology. Annex SL was developed to ensure that all ISO management system standards share a common format irrespective of the specific discipline to which they relate.

ISO 45001 has introduced a number of enhanced requirements as follows:

- Understanding the organisational context
- Understanding the needs and expectations of interested parties
- Leadership and commitment
- Participation and consultation
- Documented information
- Eliminating hazards and reducing OH&S risks
- Management of change
- Procurement
- Contractors
- Outsourcing

Duration & Price

Duration: half days

Delivery mode: This programme is available In-Company

Dates & Locations

In-Company training programmes are customised for your organisations specific needs. Most In-Company training is now delivered virtually.

In-Company Training
